Anaconda Archive Database  
Yerington Archive Documents Database Files requested for copying ARC.xlsx

Hi Dave:

The files from Taurus do seem to capture most of what was missing based on last year's visit to the archive, with a couple of possible exceptions. We have a summary table showing what was provided vs what's shown in the Sulfur/Sulfuric Acid Memo Table 3 as 'Empty File' and will forward a copy once Ilka wraps up her QC review of the information. Attached is a copy of the archive database that Jacquelyn sent out April 2011 - this should be what Taurus was using. Also attached is a copy of the database highlighting which files ARC was to copy - all of the 'missing' files were requested to be copied.

Thanks,

D. Ken Greene, CHMM

Ken,  
Ditto.  
Thanks,  
Dave

Hi Dave,

I did a quick search of the electronic database that we got from CH2M and found some of the files.

Jack, Taurus,

EPA has tasked its contractor CH2M with reviewing information on sources of sulfur used by Anaconda and by Arimetco. CH2M reviewed the document archives at the SPS facilities back in October and couldn't locate some of the files they need. EPA would appreciate your assistance in tracking down the files, or if electronic scanned versions are available, that would be good, too. Please see the list of information we need below. If you could report back to me and copy CH2M on your reply that would be great. Thanks.
